

3M™ Modulair Airline Trolley System

Technical Data Sheet

Description

The Modulair by 3M™ is a compact, easy to use airline trolley system designed to provide portable clean air in restricted access areas.

Versatile and robust, it consists of a lightweight stainless steel hose reel unit and cylinder frame that can be used independently or together.

The frame is designed to carry a pair of cylinders and where required an additional frame can be vertically stacked to allow connection of up to four cylinders.

This in conjunction with proven 300 bar high performance pneumatics delivering up to 1000 litres of breathing air per minute, permits four people to work at the same time.

Long duration operation is made simple through adjustable cylinder bands and high pressure cylinder connectors to accommodate a variety of cylinder sizes at both 200 and 300 bar.

Non-return bleed valves fitted to the cylinder connectors enable cylinders to be replaced independently for continuous operation.

Applications

The 3M™ Modulair is suitable for use in situations where clean and adequate oxygen levels air cannot be guaranteed or portability is essential.

Standards

The Modulair by 3M™ is certified to AS/NZS 1716:2012
The Modulair is also CE marked in accordance with EN139

Operation/Cleaning/Service/Training

Users need to be trained in the safe operation of this equipment. Routine checks must be carried out in accordance with the user instructions. Cleaning should also only be carried out as specified in the user instructions.

For training requirements please contact 3M Training Department on Phone: 1800 445 867 or Email: anzfallprotectiontraining@mmm.com

All servicing must be carried out by trained personnel who have been trained and are deemed competent by the manufacturer and hold a current 3M/ Scott Safety SCBA technician's certificate.

For Annual SCBA Servicing requirements please contact 3M Scott fire & Safety Service department on Phone: 131 772 or Email: scbaservice@mmm.com

Specifications

Frame	Stainless Steel
Hose Reel Drum	Stainless Steel
Wheels	Polypropolene
CEN Couplings Male	Stainless Steel
CEN Couplings Female	Nickel plated brass with stainless steel locking balls
Manifold	Nickel plated brass
Pressure Reducing Valve	Nickel plated brass
Reducing Valve Seat	Polyamide (Nylon)
O-Rings	Nitrile, Silicone, EPDM
Reducing Valve Springs	Stainless Steel
HP Pressure Gauge	Stainless Steel, Polycarbonate Lens
HP Pressure Gauge Cover	Neoprene
MP Air Supply Hose Fittings	Nickel plated brass
MP Air Supply Hose	PVC
HP Air Hose	PTCFE liner, stainless steel braiding, Estane sleeve
Valve Handwheel	Glass Filled Polyamide
Cylinder Band	Stainless Steel
Cylinder	Steel or Composite
Cylinder Valve	Nickel plated brass
Rust Tube	Brass
Airline Hose Standard	PVC

Storage

The airline trolley must be stored in a clean dry environment away from direct heat and sunlight. Storage temperature should not exceed 0°C to +40°C.

Disposal

Decontaminated equipment should be dismantled and disposed of as solid waste. Empty cylinders should be treated as special waste and disposed of according to local and state guidelines.

Reducing Valve

First stage pressure reducing valve featuring non-adjustable, spring loaded piston mechanism and outlet supply protected by pressure relief valve. Valve body and cap machined from nickel-plated brass with stainless steel spring and hose retainer U-clips.

Outlet Pressure

200 bar inlet	5.5 to 9.5 bar
300 bar inlet	6.0 to 11.0 bar
Pressure relief valve protected	Approx. 13.5 bar
Flow restrictor to gauge and whistle	<25 litres per minute

Pressure Indicator & Warning Whistle

Bourdon tube type dial indicator

Heat & Impact resistant Polycarbonate Lens

Safety blow out vent in rear of gauge

Hoses

Stainless Steel Swivel Hose Fittings

Medium Pressure Hose

Maximum working pressure	16 bar
Minimum burst pressure	80 bar

High Pressure Hose

Maximum working pressure	450 bar
Minimum burst pressure	800 bar
