## Sensepoint O<sub>2</sub>

Updates to Product and Part Numbers

Regions Affected: Global

Dear Customers and Colleagues

As part of our programme of continuous improvement, we have updated our Sensepoint sensor for the detection of oxygen (O<sub>2</sub>) and these products now features the same cell as used in our XNX and Sensepoint XCD fixed point gas detectors. The updated sensors are available using a range of new part numbers. Please refer to the table below which lists the new part numbers together with information on the products that these replace.

New Part №	Description	Replaces
2106B1432	Sensepoint O <sub>2</sub> 25 %V/V Sensor M20	2106B1430
2106B1532	Sensepoint O <sub>2</sub> 25 %V/V Sensor M25	2106B1530
2106B1732	Sensepoint O <sub>2</sub> 25 %V/V Sensor 3/4NPT	2106B1730
2106B1832	Sensepoint O <sub>2</sub> 25 %V/V Sensor 3/4NPT CSA	2106B1830
2106B1544	Sensepoint O <sub>2</sub> Cell Replacement Kit for the 2106B1432 / 1532 / 1732 / 1832	N/A
2106B1584	Sensepoint O <sub>2</sub> Cell Conversion Kit	N/A
SPSTAXO2	Sensepoint with Junction Box O <sub>2</sub> 25 %V/V	SPSTAXO1
SPSTAXO2SS	Sensepoint O <sub>2</sub> Replacement Sensor for SPSTAXO2	N/A

Note that the Cell Replacement Kit 2106B1544 cannot be used in the existing sensors 2106B1430, 2106B1530, 2106B1730 or 2106B1830 and Replacement Sensor SPSTAXO2SS cannot be used in existing product SPSTAXO1. As a result, previous Cell Replacement Kit 2106B1545 and SPSTAXO1SS are obsolete with immediate effect.

For customers wishing to replace the cell of an existing sensor, please offer the Sensepoint O<sub>2</sub> Cell Conversion Kit 2106B1584.

The manual and data sheet for the Sensepoint product will be updated in due course.

The new part numbers are active and are shipping from the factory now.

Should you have any questions, please contact your Honeywell | Gas Detection representative.
