Arras, April 11th, 2024

Object : SF6 / H2 / He
Ref : 240404

061/062/063/078 Gas code no more available

The SF6 (100% Vol), hydrogen (100% Vol) and helium (100 & 20% Vol) gases used identical cells as BM25 to detect flammable gases. For the same reason of the BM25, gas codes 061,062,063 are no longer available for OLCT20/60/80 detectors.

Cells 6313986, 6314203, 6314203-062 are also no longer available for sale.

Alternatively, for 100% Vol H₂ detection, we offer the DG-TT7/K solution with gas code 30BG.

Best Regards
