5th January 2023

FS24X End of Life Notice

Triple IR Flame Detector

Regions Affected: Global

Dear Customers and Colleagues,

After many years of serving Honeywell's customers and with the launch of FS24X Plus in April 2023, the FS24X Flame Detector will be End of Life (EOL) as of Q3 2024. Last orders for the FS24X Flame Detector will be accepted on Friday March 29th, 2024, and last shipments will be Friday June 28th, 2024. Honeywell plans to support the FS24X for approximately 5 years in the form of spare electronics modules. While Honeywell endeavours to have available spares for this period, instances of subcomponent obsolescence or excessive usage may accelerate this timeline.

The recent launch of Honeywell's FS24X Plus IR3 Flame Detector (a successor to the FS24X) offers superior performance, with more standard features and all global certifications in a single product. The FS24X Plus is dimensionally compatible to the FS24X and uses the same accessories.

Please reference the table below when transitioning from the FS24X to FS24X Plus.

| FS24X SKU | FS24X Plus SKU | FS24X Plus Notes |
|----------------|----------------|--|
| FS24X-###-23-# | FS24XP-AMGXX | Aluminium Enclosure, M25 Entries, Global Certifications |
| FS24X-###-21-# | FS24XP-ANGXX | Aluminium Enclosure, 3/4" NPT Entries, Global Certifications |
| FS24X-###-24-# | FS24XP-SMGXX | Stainless Steel Enclosure, M25 Entries, Global Certifications |
| FS24X-###-22-# | FS24XP-SNGXX | Stainless Steel Enclosure, 3/4" NPT Entries, Global Certifications |

For more information on the suitable alternative products or best product selection for your application, please contact your local sales representative or technical support.

Yours sincerely,
