## Single Stage Regulators

1767

1768

1781

1782

Calgaz, the world's leading manufacturer of calibration gases and equipment is proud to offer the most comprehensive range of specialist regulators for non-refillable and portable gas cylinders.

The 1700 series regulators are designed to provide an adjustable flow rate and are typically used with low ppm reactive gases and other high purity gas mixtures. The 1767 model and 1781 models are preset at the production facility to a user specified flow rate between 0.1 LPM - 6.0 LPM.

The 1768 Model and 1782 model can be adjusted on site by the user. The units are supplied with an easily adjustable outlet flow controller. The flow controller permits adjustment of flows to any point between 0.3 – 2.0 LPM.

The 1700 series regulators are designed for use with the Calgaz 2AL, 8AL, 10AL, and 6D cylinders.

All regulators carry a 24 month warranty and we recommend replacing them after 2 years of service and can often be shipped to you the next working day. Contact us to find out more information.
