Calgaz, the world's leading manufacturer of calibration gases and equipment is proud to offer the most comprehensive range of specialist regulators in the world for non-refillable and portable gas cylinders.

The FF20 series has been developed to specifically fit the 1AL aerosol type cylinder. Calgaz offers four variations of the FF20.

The Septum Model allows gas to be withdrawn by syringe as required. The Stem Flow version and Flow Meter versions are both fitted with a flow rate indicator using a floating ball indicator, the Flow Meter having a higher minimum flow rate. The Stem Flow is also fitted with a small inlet pressure gauge to allow the user to estimate the volume of gas remaining in the cylinder. Calgaz can also offer Nozzle which is a push fit onto the 1ALU cylinder.

All regulators carry a 24 month warranty and we recommend replacing them after 2 years of service and can often be shipped to you the next working day. Contact us to find out more information.
